

"ModSecurity: Response body too large" Fehler in Moodle

<https://nissel.it/index.php/2020/06/18/modsecurity-response-body-too-large-fehler-in-moodle/>

Bei der Ansicht von Reporten in Moodle ist manchmal die Fehlermeldung "ModSecurity: **Output filter: Response body too large (over limit of 524288, total not specified).** [hostname "domain.de"] [uri "/report/progress/index.php"]" aufgetreten. Hier hat mod security nicht erlaubt einen so großen Inhalt auszuliefern. Abhilfe hat hier eine Einstellung in den "Custom directives section" von ModSecurity geholfen.
